

Photo Film Project

The photo short film project is due on Monday, March 23. We went over these directions a few times in class.

- The film will be **2 - 3 minutes in length**.
- Each student will create a photo short film using **photos with different angles and frame sizes**.
- Voice over may be used sparingly to set up the story.
- Be innovative with your shot angles, frame sizes and p.o.v. shots.
- The more shots you have the easier it will be to edit and make clear sense of the story.
- You will create a **film treatment (summary of the short story)**. The treatment must be at least **200** words. **Make sure that the word count is located at the top of the treatment.**
- You will create a **shot list** using the shot list template found on my website under worksheets.
- You will use your photo film treatment and shot list as a guide for your photo video.
- You will add **MUSIC and SOUND EFFECTS**.
- You will use Adobe Premiere Pro to edit your project.
- **An example of the project is located on my website under "distance learning."**

If you have any questions please don't hesitate to ask me. Good luck.
